Professional Summary

System Engineer with experience in **Linux Administration**, **Oracle Database Management**, and **Network Troubleshooting**. Involved in **automation**, **system reliability**, and **performance optimization** across diverse environments. Familiar with **QGIS**, **OracleDB**, **Docker**, and **Linux-based systems**. Passionate about **system security**, **patching databases**, and supporting the development of **stable and secure IT setups**.

Core Skills

- **Telecom & RF**: Drive Test (DT), Post-Processing, RF Optimization (2G/3G/4G/5G), Troubleshooting
- **System Administration**: Linux (Oracle Linux, Shell Scripting, Security), Oracle DB, Docker
- **Tools**: TEMS Investigation, TEMS Discovery, QGIS, MapInfo, Power BI, Python (NumPy, Pandas, Matplotlib)
- **Soft Skills**: Teamwork, Time Management, Communication, Adaptability

Experience

Drive Test & RF Optimization Engineer – ZTE / Huawei / Ericsson (via subcontractors)

- Conducted **RF Drive Tests**, **post-processing**, and **network troubleshooting** across multiple vendors.
- Delivered **coverage and capacity optimization** projects, improving KPIs.

System Administrator – Al Daleel Raqmee for IT & GIS

- Managed and optimized **Linux OS environments**, ensuring uptime, security, and performance.
- Implemented automation and monitoring tools to enhance IT infrastructure.

Education

B.Eng. Communication Engineering – University of Tripoli (2017–2022)

Certifications

- **RF Basics (2G–5G)**
- **Drive Test (2G/3G), Optimization (3G/4G), Microwave Transmission, Radio Planning**
- **4G-CSFB Architecture & Implementation**

Projects

- **RF Network Optimization**—Analyzed and optimized KPIs for Huawei & ZTE networks (**Algeria–Libya**).
- **Linux Infrastructure**—Implemented secure, reliable system solutions at **Al Daleel Raqmee**
